PROFILE

A highly committed and results-driven Frontend Engineer with extensive experience building scalable, high-performance web applications using modern technologies including React, Next.js, Vue.js, and JavaScript (ES6+). Adept at translating complex product requirements into seamless user experiences, collaborating across engineering and design teams, and leading frontend initiatives in fast-paced environments. Passionate about clean code, performance optimization, and accessibility standards.

WORK EXPERIENCE

SFx money app, Samsun Turkiye

April 2024 - Till Date

Lead Frontend Engineer

- Architected and built the entire frontend of a fintech platform from the ground up using React.js, Next.js, and Tailwind CSS, delivering a fast, accessible, and visually polished product across web and mobile breakpoints.
- Led a team of frontend developers, setting coding standards, conducting code reviews, and ensuring consistent UI/UX quality across all features and releases.
- Collaborated daily with product designers and backend engineers to integrate RESTful APIs powering core fintech features: cross-border transactions, multi-currency wallets, savings accounts, and virtual card spending.
- Implemented robust state management with Redux, ensuring data consistency across complex user flows including KYC onboarding, transaction history, and account management.
- Drove performance optimization initiatives, including lazy loading, code splitting, and image optimization, reducing page load times and improving Core Web Vitals scores.
- Enforced frontend security best practices including input sanitization, secure token handling, and XSS protection in a regulated fintech environment.
- Championed agile practices within the team, leading sprint planning, retrospectives, and standups, improving delivery speed and cross-team alignment.
- Played a key role in scaling the platform to support a rapidly growing user base, maintaining high availability and performance under increased load.

Project: Live Platform – <https://sfxchange.co>

Frontend Engineer (Freelance)

- Deliver high-quality, responsive user interfaces and interactive web applications for a remote-first client.
- Collaborate with cross-functional teams to translate design mockups into pixel-perfect, maintainable frontend code.
- Build scalable, accessible solutions leveraging modern frontend frameworks and best practices.

Project: Live Site – <https://funntail.co.uk>

Genóixx

July 2025 - Oct 2025

Frontend Engineer (Freelance)

- Develop and maintain multiple web applications with a focus on modern UI/UX design principles, cross-browser compatibility, and fully responsive layouts.
- Ensure a consistent, high-quality user experience across all device types and screen sizes.
- Deliver clean, well-documented code aligned with project timelines and client quality standards.

Project: Attica HQ – <https://www.atticahq.com>

Trendx

Jan 2025 - March 2025

Frontend Engineer (Contract)

- Built a decentralized autonomous organization (DAO) platform for businesses using React, enabling transparent on-chain governance and smart contract interaction.
- Implemented user authentication, real-time data visualization, and seamless blockchain API integrations.
- Optimized application performance and state management for a smooth, consistent cross-device experience.

Project: Live Platform – <http://trendx.com>

OnlyMed

Jan 2025 - March 2025

Frontend Engineer (Contract)

- Designed and developed the admin dashboard for OnlyMed, a healthcare super-app enabling patients to book doctor appointments, make video/audio calls with medical professionals, purchase drugs, and set medication reminders.
- Built a comprehensive dashboard interface allowing administrators to manage doctors, patient appointments, drug listings, and user accounts in real time.
- Implemented intuitive data tables, filtering, and search features for efficient management of appointments and medical records across the platform.

Frontend Engineer

- Built a document validation and AI-powered evaluation system using Vue.js, delivering a performant and intuitive interface for end users.
- Designed and implemented key UI components for document processing workflows, AI feedback integration, and real-time validation results.
- Ensured cross-device responsiveness and consistently met project deadlines through strong task management and close client collaboration.

Project: CAMLDS – <https://camlds.org>

SKILLS

• Technical Skills

HTML5, CSS3, Tailwind CSS, CSS-in-JS
JavaScript (ES6+), TypeScript
React.js, Next.js, Vue.js
Redux, Git, GitHub, Figma
Node.js, PWAs, SEO Fundamentals

• Soft Skills

Technical Leadership & Team Mentorship
Agile / Scrum Methodology
Cross-functional Collaboration
Problem Solving & Debugging
Attention to Detail & Code Quality

EDUCATION

Higher National Diploma (HND) – Computer Science
Federal Polytechnic Idah
(Distinction)

Oct 2019 - Jan 2022

National Diploma (ND) – Computer Science
Federal Polytechnic Idah
(Distinction)

Jan 2016 - Dec 2018

CERTIFICATION

Certificate of Proficiency in Frontend Development
ITF -NECA Technical Skill Development Program

June 2023 - Dec 2023

REFEREES
